

Question: Will a Computer expert system ever be able to replace a human editor in providing meaningful feedback?

Sections:

- 1) An overview of the capabilities of an editorial program
- 2) analysis on the capabilities of artificial-intelligence expert systems
- 3) your answer to the above question, with an explanation of what a computer system will and will not be able to do.

Pages:

- 1) Introduction / Abstract
- 2) Section 1
- 3) Section 2
- 4) Section 3
- 5) Exiting Statements and Conclusion

Introduction:

- 1) Recent re-surfacing of artificial intelligence
- 2) Neural Networking advancements
- 3) Introduction to editing

Section 1:

- 1) The problem of editing
- 2) how an editing program would have to decide the best decision
- 3) potential ways of learning changes in language

## **Introduction**

With the recent mainstream revival of “Artificial Intelligence” and “Neural Networks” a large amount of research and work has gone into improving these fields. Software companies are now starting to use Neural Networks in their solutions
